The amendment filed on 15 June 2006 has been entered and overcomes the objection to the specification.

Allowable Subject Matter

1. Claims 1, 2, 4-12, and 14-18 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding independent claim 1, the prior art of record neither shows nor suggest a method for fabricating a mesh structure mounted between an anode plate and a cathode plate of a tetraode field-emission display, comprising; forming a soft insulation coating layer on a flat film; laminating a metal conductive plate as a converging electrode layer with a plurality of first apertures to the coating layer, such that a filler of the coating layer is filled in each first aperture; removing the coating layer but remaining the filler in each first aperture after baking, forming another coating layer on the converging electrode layer as an insulation layer, sintering to harden the insulation layer, forming a gate layer with a plurality of third apertures corresponding to the first apertures on the insulation layer, respectively, sintering to have the gate layer firmly attached on the insulation layer; forming one protective layer on the gate layer with a plurality of through holes corresponding to the third apertures, respectively, such that a plurality of second apertures formed on the insulation layer by etching, forming another protective layer on

the converging electrode layer with another through hole corresponding to each first aperture, such that each filler is removed by etching; and removing the first and the second protective layers.

Due to their dependency, claims 2, 4-12 and 14-18 are necessarily allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
